

# Environmental Policy

Rehlko – Lombardini S.r.l. is dedicated to delivering **responsible** and **sustainable products and services**, ensuring processes that minimize environmental risks. The design of machinery, plants, equipment, and workplaces is developed through methods and organizational practices that **safeguard the environment** while meeting market expectations. The company views the proper management of environmental aspects as essential to business growth and recognizes the **Environmental Management System** as a key instrument for implementing its environmental policy. To ensure **alignment, effectiveness, and compliance**, Rehlko – Lombardini S.r.l. conducts regular audits and adopts **corrective or improvement measures** to address any deficiencies.

The strict compliance with all *regulatory obligations*.

The pursuit of *continuous improvement* of the Environmental Management System.

The adoption of *all necessary measures* to protect the environment.

The use of all types of *energy* and the adoption of programs aimed at energy efficiency.

Target: -90% greenhouse gas (GHG) emissions by 2045, as stated in the *ESG Powering Impact* document of May 2025

The *direct involvement* of all people so that they feel responsible for protecting the environment.

The dissemination and promotion of *environmental awareness* among the various suppliers.

An *active cooperation* with public authorities and an *open dialogue* with stakeholders.

The development of the environmental policy has been carried out ensuring its coordination with the Quality (ISO 9001), Energy Management (ISO 50001), Gender Equality, and Occupational Health and Safety policies.
