

rehlko

Industrial Power
for Government and Defense

For more than 50 years, Rehlko has provided backup power to every branch of federal, state, and local government. We understand your specialized backup power requirements, that's why we provide you with dedicated account managers who live and breathe government operations, both CONUS and OCONUS.

Why Rehlko?

The smart choice for government agencies

At Rehlko, we don't do one size fits all. We help create custom solutions for you and your agency. But the care doesn't end there. We'll be by your side every step of the way to make sure the job's done right.

We *protect* America's power

Our commitment to you is twofold: we'll provide reliable, state-of-the-art equipment, and we'll make the entire process easy—from quote to installation.

Value Engineering

Rehlko products are designed to work seamlessly together, ensuring complete system reliability. Our products are prototype and production-tested to ensure maximum performance and quality.

We offer products that meet the following codes and standards:

- EPA Emission Certification
- UL 2200
- IBC Seismic Certification
- California HCAI
- NFPA 110
- ISO 9001:2015

Trusted Customer Service

- Dedicated government account managers
- Government contract vehicles
- Rapid quote delivery
- Superior service and support worldwide

Visit powersystems.rehlko.com/government to learn more.

Technical Expertise

- Fully customizable offerings
- A wide selection of solutions including standby and prime
- Easy-to-use, highly programmable controls
- State-of-the-art technologies
- Remote and local enterprise monitoring and control
- Program management, logistics, and installations/start-ups

Federal Government Experience

The following agencies have trusted Rehlko power systems:

· USDA	· HUD	· DOT/FAA	· DOC/NOAA
· DOD	· DOI	· VA	· USPS
· DHS	· DOS	· EPA	· TVA
· DOE	· TREAS	· NASA	· NPS

Custom power for government applications

Standby Generators (SIN 335999)

- Natural gas/LP-fueled models to 500 kW
- Diesel-fueled models to 4000 kW
- Exceptional motor starting and voltage recovery
- Configurable to a variety of system needs
- Generators meet NFPA 110 requirements for start time and are all G3-rated per ISO 8528-5

Mobile Generators (SIN 335999)

- Diesel models from 90 to 175 kW Tier 4 Final and EPA-certified
- Minimum of 24-hour runtime fuel tanks with 110% containment
- Voltage selector switch for multiple options
- Sound-attenuating enclosures for quiet operation
- Intuitive, user-friendly controls

Marine Generators (SIN 335999)

- Generators from 12 to 200 kW
- 50/60 Hz frequency adjustable
- EPA emission-compliant

Automatic Transfer Switches (SIN 335999)

- Automatically transfer power from the utility to the generator and back
- Seamlessly integrate with Rehlko power systems
- Standard and custom options from 30 to 4000 amps
- Integrated communication options
- Service entrance, non-automatic, automatic, and bypass configurations

Paralleling Switchgear (SIN 335999)

- Customizable to your specifications and facility needs
- Compatible diesel and gas generator sets
- Intuitive user interface

APM/Rehlko Decision Maker® Controllers (SIN 335999)

- Designed for generators from 5 to 4000 kW
- Programmable to meet all applications
- Features network and remote communication

Success *story*

The Federal Aviation Administration's (FAA) standby power contract supporting the National Airspace System's (NAS) critical applications was awarded to Rehlko in 1995 and has been re-awarded to Rehlko every contract period since then.

As a result, Rehlko has supplied hundreds of mobile and fixed generator sets, transfer switches, and switchgear to major support centers and critical facilities. Rehlko also provides technical service and systems training, logistical staging, and aftermarket parts support 24/7, 365 days a year.
