

Hurricane-rated Enclosures for Industrial Generators

When severe weather strikes, you can't afford to take chances with your backup power. Rehlko offers enclosures engineered and tested to deliver proven protection and peace of mind when you need it most.

Built to *withstand* any hurricane

Why Rehlko?

Tested

Rehlko offers a complete package tested for:

- UL2200
- Wind load at 186 mph
- Missile impact, Level E

Single-source warranty

The same engineering team designs the generator and enclosure, which means the entire power system is covered by Rehlko.

Service and support

We have a full network of distributors throughout North America to meet your power needs.

Technical data

Rehlko enclosures are tested by Florida Professional Engineer (PE) per the following standards:

- Large Missile Impact Level E [Florida Building Code (FBC) TAS-201-94]
- Uniform Static Air Pressure (FBC TAS-202-94)
- Cyclic Wind Pressure Loading (FBC TAS-203-94)
 - Ultimate Design Pressure – Wall Panels ± 65 PSF
 - Ultimate Design Pressure – Roof Panels ± 100 PSF

Factory-direct hurricane-rated enclosures

When you live in a hurricane zone, you need reliable backup power that can stand up to strong winds and impact. Rehlko has you covered.

We're the first generator manufacturer to offer factory-direct hurricane-rated enclosures on our industrial stationary gas and diesel generators.

With testing on complete enclosures, Rehlko meets both impact and wind load certifications per the Florida Building Code requirements.
